Full-Stack Developer • Cybersecurity

Enthusiast • AI-Augmented Engineer

Jabalpur, Madhya Pradesh | 6263479576

abhirajsingh2k5@gmail.com

Full-Stack Developer specializing in modern web development, authentication, and secure engineering practices. Experienced with React, Node.js, MongoDB, and cybersecurity tooling. Passionate about solving real-world problems using scalable development, automation, and AI-augmented engineering workflows.

Professional Experience

Full-Stack Web Development Intern

CodSoft InfoTech, Remote

November 2025 - December 2025

Built full-stack features using React, Node.js & MongoDB. Implemented JWT authentication & secure REST APIs, Improved application performance through debugging and optimization.

Ethical Hacking Intern

iStudio, Remote

November 2025 - January 2026

Conducted reconnaissance and penetration testing using Kali Linux. Analyzed vulnerabilities using Wireshark, Nmap, BurpSuite, and OWASP ZAP.

AI & Digital Skills Intern

AICTE x IBM SkillsBuild, Remote

November 2025 - December 2025

Completed guided AI learning modules and cloud-based technical practice tasks. Participated in mentor-led sessions focused on industry workflows and skills. Strengthened communication, teamwork, and digital literacy in a professional environment.

Education

Bachelor of Technology (B.Tech) in IoT, Cybersecurity & Blockchain August 2023 - Present Global Nature Care Sangathan Group of Institutions at Jabalpur, Madhya Pradesh, India

Key Skills

React, JavaScript, HTML, CSS, Tailwind CSS, Node.js, Express.js, REST APIs, MongoDB, SQL, JWT Auth, OWASP, Git, GitHub, Postman, Docker (Basic), Linux Terminal, AWS Basics, Azure Fundamentals, Kali Linux, Wireshark, BurpSuite, Nmap -

Certifications

Tata – Cybersecurity Analyst

Mastercard – Cybersecurity Virtual Experience

Walmart – Advanced Software Engineering

AWS – Solutions Architect Simulation

Cisco – Introduction to Modern AI

Outskill x MoneyControl – Generative AI

Microsoft Azure Fundamentals

IBM – SQL & Relational Databases

Projects

Welth — AI Finance Platform

Sept 2025 – Dec 2025

Tech: Next.js, React, PostgreSQL (Supabase), Prisma, Clerk, Tailwind CSS

Built an AI-powered finance platform with secure authentication and user-specific data handling.

Implemented expense tracking, budget monitoring, and automated email alerts for overspending.

Designed a responsive dashboard UI with scalable backend using Prisma and PostgreSQL

Get Me A Chai — Donation Platform
2024

Aug 2024 - Oct

Built a secure authentication-based donation platform using React, Next.js, and MongoDB.

Implemented login, donation tracking, responsive UI components, and database handling with a smooth user experience.

Portfolio Website

Dec 2024 - Feb 2025

HTML | CSS | JavaScript

Designed and deployed a personal portfolio showcasing skills, projects, and achievements. Optimized UI for mobile compatibility.
